

DentalForum meets DentalZentrum

concepts – competence – communication

We share our experience and knowledge –
live demonstration in a day of internship

Dental

”

Welcome to Bayreuth – welcome to the DentalZentrum

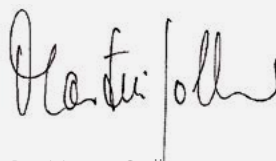

We offer in one-day- or two-day-courses a wide variety of our focus and specialization in implantology, reconstructive therapy and functional treatment concepts.

Within the guest programme we exchange experience, daily work flow and an inside view in the field of implant-, bone-, softtissue surgery. Additionally we review the prosthetic treatment

step-by-step with patient cases. With your registration you can give us a conception what you will like to see and be demonstrated, if possible in live-surgery or treatment.

Be sure that you will remember these days.

I am looking forward to meet you in Bayreuth

Dr. Martin Gollner

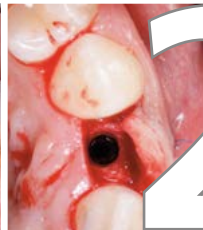

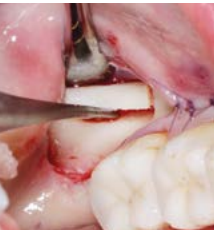

TOPICAL FOCUSES

1

IMPLANT SURGERY

3D-planning, navigation, different types of implants, bone quality, all-on-four-concept, etc.
